

# Best Powerful Live-Game Engagement

PowerPlay Systems provides patent-pending gaming solutions that changes the way the world plays lottery, DFS, and Sports betting games. With our exclusive live-play experience, we put the Players in control.

Say goodbye to the 'pick-and-wait' game format. No longer will games be played simply by making picks and waiting for results. With our games, players have the power to control their own destiny by making live-play changes.

We provide players with Powers to make changes to their lottery picks, fantasy sports picks, and bet slips during live gameplay. Imagine the engagement possibilities with a live interactive lottery game!

There are different Powers for each type of game but all Powers add another level of engagement and excitement to gameplay.

With Live-Play gaming, you will open up a whole new revenue stream by driving players to your game during live lottery or sporting events. With more players interacting with your live games, you can generate additional sponsorship and advertising revenue.

Live-play Powers are valuable to players! You can sell branded game Powers to generate additional revenue during live gameplay.

Whether you are a casino, state-run gaming operator, media or retail business, or a charity operation... our live-play game options will power exciting new revenue streams.
