
If you're a fan of Heath Ledger as the Joker, chances are you're also curious about his diary. Some claim that Diary was written as a sort of inside joke with friends to see if he could successfully fool those who read it into thinking he was an earnest artist. Whatever the case, people have been interested in seeing what's in it for years.

We've got good news! The Diary PDF is now available to purchase online and we've got a link below where you can buy it instantly! <http://www.buypdfbooks.com/> This book is a diary from 2005. It talks about Ledger's experiences from late 2004 through the end of 2005. Some may recognize it from various interviews, news articles or articles written by Ledger himself regarding his role in The Dark Knight. For this edition we have condensed the original into a single PDF that is a little over 1MB in size, and we've also included a few pages of related images and stories that were excluded from the original version. We're happy to announce the release of our first book! It contains over 100 pages featuring over 300 pages of Heath Ledger documents!
