The following quote is from Jonathan Wines article on "100 Best Company Slogans" on Inc.com. The quote is about McDonald's. The following quotes are from Wikipedia article on Best logo. The following quote is from Wikipedia article on Best taglines. The following quotes are from Wikipedia article on "Best Indian Brands". The following quotes are from Wikipedia article on "Best Indian brands". Category:Advertisements

Early rehabilitation after total knee arthroplasty. The focus in the management of total knee arthroplasty (TKA) has shifted from a 'fix and forget' approach towards a more active role in rehabilitation. This article reviews the literature relating to the short-term postoperative rehabilitation of TKA, with a focus on the components of an early rehabilitation program. Current evidence suggests that early, active, functional rehabilitation can significantly improve the early functional outcome of TKA. Early mobilization and range of motion should be encouraged to facilitate early weight-bearing. However, there are insufficient data to support the superiority of rehabilitation protocols over others.

Human apolipoprotein B-100 as a substrate for endoproteolytic processing by kallikrein 7: an enzyme-resistant fragment is cleaved from its carboxyterminal by human glandular kallikrein 1. Human apolipoprotein B-100 (apoB-100) is the principal apoprotein of low-density-lipoprotein (LDL). Human kallikreins 1 and 7 have been shown to be the major proteases that cleave apoB-100 in the medium and small intestine, respectively. We determined the primary structure of the 32 amino-terminal amino acids of the 5'-regions of the apoB-100 fragments cleaved by both kallikreins, and compared their cleavage pattern with that of the human glandular kallikrein 1. Human kallikrein 1 cleaved apoB-100 at an Arg-1418 site to generate an Arg-1320-Lys-1419 fragment (K1-B-1), and a further endoproteolytic event generated a new carboxy-terminal residue Gly-1329, resulting in an Arg-1320-Gly-1329-Lys-1419 fragment (K1-B-1-1). Similar to the pattern found for kallikre 2d92ce491b
