Serial: RH6M6-7PPK4-YR86H-YFFFX-PW8M8. Windows xp home edition Q: What are the constraints on html urls with c# webforms? I have an existing project that I have been tasked to make html friendly. However, to make things easier, I have decided to use c# webforms instead of aspx. This way I could remove the entire web.config and user profile control, etc. However, I am encountering a bit of a problem with the link and image tags. For example: Now this works fine. But once I go html friendly, the href becomes: Now the url does not work. The original is not a problem, it just makes the html more friendly. Is there a way to make it so that the href will work like it originally did? A: The original link is good because the
