

Category:Mobile Suit Gundam SEEDQ: Makefile with case statement I'm working on a simple Makefile for linux, and i have a problem with the cases, i'm not sure how to use them correctly. Here is what I want to do: /RMA /BUILD_MM echo "Para hacer modulo" > modulo [...] /RMA [...] BUILD_MM: @if [-d /RMA/BUILD_MM]; then \ echo "Para hacer modulo" > modulo; \ [...]; \fi I have tried a lot of case, but always with some errors. Like that: BUILD_MM: @if [-d /RMA/BUILD_MM]; then \ \$\$[1] := echo "Para hacer modulo" > modulo; \ [...]; \fi that doesn't work because the first argument is a string and the second argument is a variable (that I don't know). I have tried to do: BUILD_MM: @if [-d \$\$[1]]; then \ echo "Para hacer modulo" > modulo; \ [...]; \fi But that doesn't work because they cannot be passed through as string (the. is needed and i do not know how to pass it to case). Any idea about how to do that? A: Here is a GNU Make solution that should do what you need
