* **Adobe Photoshop CS6:** This program is available both on CD and as a download through Adobe's website. The download is free, and you'll need a subscription to the program (see the discussion on "Getting a subscription" earlier in this chapter) to get access to the content found on the CD. If you're a beginner, be sure you get the tutorial CD, not the Photoshop software CD alone. * **Adobe Photoshop Elements:** The Photoshop Elements application is designed for beginners who are interested in using Photoshop for image editing but don't have experience with editing raster images. This is the easiest application to learn on, because all you have to do is drag and drop to manipulate the layers. Because of this lack of experience, be sure you read the tutorials that come with the program. * **Photoshop Touch:** This application has all the functionality of Photoshop CS6 but is optimized for touchscreen devices such as tablets and phones. * **Adobe Lightroom:** Lightroom is a great organizing program that enables you to cull your images and export them for viewing on a website. You can also use it to transfer files and get started with exporting your images. After you've become familiar with the editing tools in Lightroom, you can then transfer your images to Photoshop.

What's New in the Adobe Photoshop 2022?

Meet Alice! Meet Alice (whose information we obtained through a breeder from Russia, we aren't sure how old she is but she's still a puppy), she is a lovely and feisty little ball of fluff! Alice was born in July 2014 and she's just 8 months old. We have since decided that she's a very lovely dog! Alice is a great all-rounder and she has a lovely temperament (minus being a bit territorial with her toys)! Alice is looking for an active and ambitious boy who enjoys a live and play all day long! We are in the process of making a home for both of us so in the meantime, we're looking for a confident, well-behaved human to help us out. We currently live in Sydney, but we're looking for a place where we can live for a while. Believe me when I say that when you share your new little crazy fur baby with us, you'll be hearing much more about him, especially if you find him to be fun to be around, lively and playful. If you're interested in trying out a puppy, you can check out how Alice is doing at Birmingham, London, Manchester or Paris! Obviously, we have a lot of very important info and information on how to take care of Alice (including a training timeline for the first months) in our adoption FAQs, so you can check that out too. Hope to hear from you! You can find some photos of Alice on our Facebook Page.
