app, and a very useful one, because it allows you to add PayPal, Bitcoin, Mastercard, and American Express as your bank, so in case you need to pay for something using your card, it's very easy to do with MoneyFox. It's not your regular old app with a couple of card types; instead, MoneyFox does something called "plumbing", and has several plugins to add different capabilities. In other words, you can add support for any payment method by adding the plugin. This, in turn, can be done by using and adding plugins, like one for PayPal, or one for Australian bank accounts, because MoneyFox has plugins for those too. MoneyFox for

Android is a full-fledged app, so it feels like it's as close to a phone as you can get. When you have a bank with the app, you get access to the app directly from your phone, and not from the web. You don't have to open it on your laptop, either. Because it's a full-fledged app, it does a little more than just
