- Five different models - 5 different types of lanterns - Textures to fit any desktop resolutions - You can choose how much you want to see on the screen - Customizable settings - No ads - Supports all monitors! - Onscreen controls - Star rating: 4.8 What's new: Version 2.0 has a major new feature: the ability to change the text color of the lantern! Enjoy! A splendid screensaver with a modern twist Set in an urban night environment, the screensaver Lantern comes with the lights of the city hanging in the air, enticing you to make your way in the direction you feel is right. The layout is simple, but not something that will take you too much time to try and customize. The text color is adjustable (only in Photoshop version) and there's a pair of lanterns in the back, which are completely optional. Take a walk in a lantern at night A night time stroll on a holiday or just a walk on the balmy evenings with a lantern in your hand, simply because you want to, would definitely make you feel good about yourself. With Lantern you are not only taking a stroll, you are also putting on a show, because you have a lantern that is a very light source. The only downside to the app, which is a bit of a shortcoming, is that it only comes with five different lanterns. A good screensaver with lanterns Lantern is the quintessential screensaver. It would be great to have an app like this on phones with lesser memory, but it's a nifty screensaver with cool lanterns. If you have a 16:9 monitor you have an easier time customizing the lantern, but other than that you're just looking at some cool lanterns. An enjoyable screensaver with lanterns If you are looking for a screensaver that does not load a picture but instead makes you sit back and watch a series of different lanterns, then you can do that with Lantern. Although Lantern does not feature any bells or whistles, it does a good job showing off the various lanterns it has to offer. An impressive lantern screensaver The lantern screensaver is probably the most attractive of the applications that have been included in this list, a fact that can be easily felt by looking at the quality of the visual design. With Lantern you are not only taking a stroll, you

System Requirements For Lantern 3D Screensaver:

For Linux users, I recommend that you run it from a Virtual Machine. I did so myself, but I guess you can do it from a regular virtualbox just fine, too. If you want to install it in a new location and then start up Eclipse and SWT, you can use the script below (Install Script). It installs the Eclipse SDK and SWT in the same folder as the extracted tarball. ## Install Script ## cd \$HOME/Downloads mkdir Eclipse cd Eclipse wget
