If you have thought about installing a new computer system, but want to learn some coding basics first, have a look at Turbo C++, an introductory C++ book. Turbo C++ is published by Addison-Wesley. They have also created a series of C++ programming books. Turbo C++ is a fairly old, but fairly comprehensive book. The most important thing about this book is that it teaches the entire programming language, C++. You can download the e-book for free from the publisher's website. From what we can tell, the publisher is selling it for \$19.99. So, if you want a book that will teach you the programming language, this book will probably be a good investment. We reviewed Turbo C++: Programming for Beginners. If you want a template for a simple, easy-to-use website without any coding, all you need to do is find a good CMS (Content Management System). Most WordPress enthusiasts agree that WordPress is the best CMS. Most people who are looking for a template solution will find out about WordPress. It is so popular that there are a large number of WordPress themes available online. Moreover, WordPress comes with its own design software. This is why it can be used to create a visually attractive website without any coding. If you prefer not to use WordPress, there are other alternatives that offer a CMS that can be accessed online without installing anything on your PC. For example, you can try Drupal. Drupal is an open source, content-management system. It is based on PHP, so you will need to install it. Drupal is free and easy to use. You can use the website builder to design a website for yourself. There are over 130 modules available that can be easily installed. You will not need any coding skills to create a website with Drupal, and you can use this CMS for free. However, many Drupal users find it hard to understand some of its functions. Others find the tool confusing. There are many usability issues, and many users have tried it, but never used it again. Another alternative CMS is Joomla. It is not free to use, but does not require a lot of technical expertise. There are many template collections available online. These can help you get started.
