I've got an array of numbers that I'm trying to use as a query in an SQL statement to select from, but I need to filter it by something that I'm not sure how to do. I'm trying to filter the array so that the user only sees what they're paying for, and not if they're getting any freebies. So if I had [150, 175, 225, 350, 600] in the array, I only want it to display whatever they're paying for. So this is what I have so far: var selectedNumber = 150; var query = "SELECT * FROM books WHERE num = " + selectedNumber; console.log(query); I'm trying to filter the array so that it only displays the values that they're paying for. Thank you! A: You want to use an array filter, more specifically: const selectedNumber = 150; const values = [150, 175, 225, 350, 600]; const filtered = values.filter(item => item !== selectedNumber); console.log(filtered); Hope that helps Luigi Bertolaso Luigi Bertolaso (20 January 1896 – 5 June 1975) was an Italian fencer.
