Drag and Drop Skinning A fully-integrated online Skinning community.
WindowBlinds.exe Skin the control buttons in the title bar, windows, taskbar, Start menu, and dialog box. References External links Skin Center WindowBlinds skin developer forum WindowBlinds Category:Windows-only software
Category:Computing in Wales Category:Proprietary softwareQ: How to select data from an array that matches the date I have this array \$kurl = array("20170711_1200_ins", "20170711_1430_ins", "20170711_1900_ins", "20170711_2200_ins", "20170711_2300_ins", "20170711_2330_ins"); The problem is that I have this string that i can get the time using date("H:i", strtotime(\$time)); and the date from \$time of course. But i want to retrieve the data from the array depending on the time i got. So if i have a time like this \$time = "20170711_2330_ins" then I get the array \$kurl = array("20170711_2330_ins", "20170711_2330_ins", "20170711_2330_ins"); How can I do this? I was thinking something like this \$sql = "SELECT * FROM `source` WHERE `time` = \$time "; But I'm not really sure how I should make this. Is this a good approach? A: Okay I found something nice. \$sql = "SELECT * FROM `source` WHERE `time` >= '20170711_2330_ins' AND `time` The Town & Country is the no. 1 hotel in Cleveland within 4 star category, with 89 guests. The Village at Mentor is the no. 1 hotel in Cleveland within 4 star category, with 249 guests. The Plaza Hotel is the no. 1

Free Windows Themes Open source. Stardock WindowBlinds is a free, fully functional community version of its professionally developed software. Explore the Community Version.
