## FpHelp Builder Crack Keygen For (LifeTime) [Mac/Win]

fpHelp Builder Free Download is an add-in for Microsoft FrontPage 2000 or higher. This is a very simple and powerful Microsoft FrontPage add-in that allows the conversion of a web site to a Microsoft HTML Help file (CHM file). Your workable of FrontPage is enough to construct the Help file from any web site. Once your web site is complete, you can compile it to create the final compressed help file (CHM file). As a help author, you manage the locations of your topic, contents, index, and other files. You can also modify the web site to match the design of your help system or can make other changes depending on the size and complexity of your system. Instead of creating the traditional Help files you can convert any web site into a single compressed help (.chm) file which is the help standard for Microsoft Windows. After that you can distribute your sites as single units which could be manuals, Helps, guides, readme files, e-books, etc.. The main advantage of the fpHelp Builder is its simplicity and usability: in a few mouse clicks you will receive the CHM file from your FrontPage web site. Version history: v1.0.9: [12.03.2004] \* Added the ability to create compressed help files v1.0.8: [09.22.2003] \* Added ability to link to any web site \* Some additional help pages \* Some minor bugs fixed v1.0.7: [07.23.2003] \* Added an authoring interface with HTML Help Workshop \* Added help topic manager \* Added auto-index \* Added the ability to configure the filename in the "Save as" dialog \* Added a sample topic \* Minor bugs fixed v1.0.6: [06.10.2003] \* Added sample help topics \* Added sample navigation structure \* Improved Help report \* Fixed bugs v1.0.5: [04.10.2003] \* Improved Help report \* Improved Help navigation structure \* Added some new features v1.0.4: [03.10.2003] \* Fixed bugs \* Added documentation \* Added Help report \* Added some new features v1.0.3: [02.10.2003] \* Added some new features v1.0.2: [01.10.2003] \*

## FpHelp Builder Activation Key

☒ Use tag to link to another page. If you want a link to open in a new window (n links deep), use . ☒ For styling the links, the colors are defined in the fpHelpBuilder.cfg file. ☒ The material for the Helpbook will be displayed on the HelpBook.html file. ☒ If you don't modify this file, the Helpbook will be added to your HTML Help file. ☒ Any modification you make to this file will be lost after a new version of fpHelpBuilder is released.
