If you do not know how to install the driver, please refer to the driver video tutorial above.. For more info on the products and features, please check out the official product page.Q: how to block the button when mouse out from the button I have four buttons in a 2x2 Grid. I want to make one of the buttons will be active when the mouse is hovering over that button. I don't want the button to be active when mouse is hovering at the cell or outside. Here is the only thing I tried: protected override void OnMouseMove(MouseEventArgs e) { mButtonButtonActive=true; } That seems not work. what should I do? A: It can be done by using MarqueeButton - a simple button, which change the state when mouse is hovering on it: 3e33713323
