
Way Out Download Exe File !!LINK!!

From the java folder go to jdk\bin and there should be a java.exe file. Right click "java.exe" and go to properties. OK, right down to the desktop. Go to the "system32" folder. Navigate to: C:\Windows\SysWOW64. If you are using Vista, then there will be a WINNT folder, and in it a HOMEPATH folder. Right click on the HOMEPATH folder and select Properties. The properties window opens. On the Previous Versions tab, look for the Path to Previous Instance option. If it is not specified, then you need to enter the path to the file. If you don't see the "Previous Versions" window, then click on the "Advanced Options" link.
