Mar 13, 2020. Control Ncstudio V5.5.60-1 ENGLISH Setup. A: You're looking for a file named Control_Ncstudio-Setup_ENGLISH-Setup.exe. Make sure you are using the current version by looking at the file size (always have it checked in the Windows File Size checker) and verifying the name of the file. A: Use the following: (Chinese) Download the Chinese version of NC-Studio from the official site. And then you can locate the "NC-Studio Setup.exe" from anywhere it exists. (e.g. C:\Program Files\NC-Studio) If you want to update this binary, uninstall the previous version first. Follow the steps below to update the "NC-Studio Setup.exe": Put the version of "NC-Studio Setup.exe" you want to update to the "C:\Program Files\NC-Studio\Update" folder. Right click the file inside the folder above and select the "Run as Administrator." Then, click "Unblock" to remove the "access denied" error message. Next, select "Rebuild." After that, the "NC-Studio Setup.exe" updated successfully. Q: addEventListener to static html I want to create a simple clicker game using react. I have a div and want to add an event listener
