Bundles [edit] AutoCAD and AutoCAD LT come in two kinds of bundles—basic and professional. The former includes AutoCAD itself, which is the only item that is actually necessary to create professional drawings; the latter includes other software products that may be of use in certain tasks, such as the Autodesk Architectural Desktop product for architectural work. Basic bundles are identical in function to those that were available when AutoCAD came out. Professional bundles also have a drawing component, the Drawings component, and usually include support materials such as a floppy disk with installation software and a carton for the product itself. These products are typically priced at \$1,300 to \$1,500. You can find them at computer stores, Autodesk or Autodesk Authorized Resellers, and many brick-and-mortar retailers such as Office Depot and Staples. Bundles of a certain version of AutoCAD (e.g., 2014 or 2015) are not necessarily compatible with each other. Check with a sales representative before buying bundles of AutoCAD
