History AutoCAD began life in 1982 as a CAD software program. It was developed and marketed by Autodesk, a U.S. developer and publisher of CAD and drafting software applications. Autodesk was founded in 1969 by Carl Bass and Ed Vermillion to market their 3D geometric modeling application, Multiviewer, which they sold to Remington Rand Corporation. In 1972, Autodesk released its first product, Sketch Pad. A year later, Autodesk hired its first employee, Larry Bird. In 1974, Autodesk introduced DrawMaster, an on-screen drafting application for use with Multiviewer, and in the next few years acquired Digital Design Inc., which provided toolkits and libraries for software developers. In the 1980s, Autodesk moved its CAD software out of Multiviewer and into its own products. By the time Autodesk acquired Digital Design in 1982, the company's growth had caught the attention of Japanese publisher Nikkei. Nikkei had heard about Autodesk's top-quality products and hired Autodesk's president, John Flansburgh, to oversee a deal to bring Autodesk to Japan. Nikkei became Autodesk's parent company in 1986, and in 1997, they created a separate company named Navigator Holdings Inc. to market Autodesk products, Autodesk Online was created to provide an online presence for Autodesk's products. In 1999, Autodesk's offerings were divided into seven separate product lines; Desktop, Engineering, Construction, Entertainment, Home, Media & Entertainment, and Professional (formerly named Alias). In 2000, Autodesk's Corporate Application Division was added to the Engineering product line, and in 2003, Autodesk added its educational product, AutoCAD LT. In 2006, Autodesk released AutoCAD Map 3D, the first true 3D modeling application, and released Web Authoring Application (WAA), an internet-based authoring tool for Web sites, apps, e-books and more. The 2007 introduction of AutoCAD 360 Cloud Technology moved Autodesk's desktop CAD and drafting software applications into the cloud. In 2015, Autodesk released AutoCAD for iPad, the first-ever iOS-based CAD and drafting application. Products Drawing, Drafting, Modeling, and Data Management Autodesk AutoCAD and Autodesk Inventor are

Q: Dynamic variables in javax.crypto and Encryption I have an encryption method that looks like this (taken from javax.crypto): Cipher cipher = Cipher.getInstance("DESede/CBC/PKCS5Padding"); SecretKeySpec myKey = new SecretKeySpec( key.getBytes("UTF-8"), "DESede"); cipher.init(Cipher.ENCRYPT\_MODE, myKey, new IvParameterSpec(ivBytes)); This is a method that encrypts a String. I used the sun.security.provider.DESede class and the javax.crypto.spec.SecretKeySpec class. And I have a method like this: public static void main(String[] args) { KeyGenerator keygen = KeyGenerator.getInstance("DESede"); keygen.init(new KeySpec(my\_key)); SecretKey my\_key = keygen.generateKey(); MessageDigest my\_md = MessageDigest.getInstance("MD5"); byte[] iv = my\_md.digest(my\_key.getEncoded()); IvParameterSpec ivspec = new IvParameterSpec(iv); Cipher cipher = Cipher.getInstance("DESede/CBC/PKCS5Padding"); cipher.init(Cipher.ENCRYPT\_MODE, my\_key, ivspec); byte[] encoded = cipher.doFinal(("hello".getBytes())); String result = new String(encoded, "UTF-8"); System.out.println(result); } I don't
