

List of Downloading Bot . Switch bot v3 by padmak. Switch bot v3 by padmak 11 Relative File Size 0.90 KB Q: Scraping a HTML table using Python I'm trying to scrape a table from a website. The table's content looks like this (the only thing I'd like to retrieve is the number of rows): Rank Name Date 1 2 I'm looking for a solution that works in Python (3.3). My attempt to solve the problem

```
import requests
import pandas as pd
from bs4 import BeautifulSoup

with open('test.csv', 'w') as test_file:
    writer = csv.writer(test_file)
    writer.writerow(["Rank", "Name", "Date"])
    r = requests.get('url')
    data = BeautifulSoup(r.content, 'lxml')
    table = data.find('table')
```

What is the square of a number? This is the number of solutions if the equation has an even number of variables.. metin2 switch bot padmak v2 beta 1 month ago .
