The iPhone maker this week launched the fifth-generation version of its iOS operating system and the iPhone 3GS. The leap forward in hardware capabilities has not inspired a leap forward in iPhone design. The new "iPhone 3GS," for short, is thicker, heavier, and shorter than its predecessor, the iPhone 3G, which it replaces. It is intended primarily as a free upgrade for existing 3G iPhone users. (And the phone's most visible feature is a redesign of the phone's charging and syncing port, which Apple says will be more resistant to water damage.) It is also older than most consumers think: Apple sells new 3G iPhone 3Gs at \$99. Apple also offers a free upgrade to these phones, if the device is used only as a mobile phone and not as a music player, alarm clock, Web browser, or gaming device. Other newer phones with cellular networks, such as the BlackBerry Torch 9900, carry about the same price tag as the new iPhone, but allow the ability to use a wider variety of applications. The iPhone 3GS will be available at the Apple Online Store on Friday, for \$99 and \$149 with a two-year contract. A
