“This is the first time we’ve had motion capture data for actual players and used it in the game,” said Ian Storey, Head of Global Football at EA SPORTS. “We have multiple motion capture data sets from real players that will allow us to produce the most authentic gameplay possible, right down to the way the ball moves on the pitch.” “The new HyperMotion Technology represents the single most significant advancement we’ve ever applied to the game,” said Matt Bilbey, Senior Producer at EA SPORTS. “We’ve recreated the basic essentials of the sport, all while applying cutting-edge motion capture technology that will put us on a new level of football realism.” There are many other new features introduced in Fifa 22 2022 Crack. **Real Player Data** – For the first time ever in FIFA, all key motions and positions are taken from motion capture data recorded of real players playing on FIFA 22. Every player moves and positions himself differently on the pitch, for example, a goalkeeper will turn his back to goal kicks and run backwards, while some strikers will drop deeper to receive passes. We have replicated this data, with a much higher level of accuracy. All players have unique animations. The players will react realistically to the ball and move realistically to keep with the ball. **New Player Types** – Players in FIFA 22 will have three different player types, each with their own unique characteristics. There will be wingers, central midfielders and attacking strikers. The club will be able to create unique player attributes and forms of play based on how the players perform, and the set-up of the pitch. **Individual Player Stats** – We have created a new system for tracking the performance of every player on the pitch and how they rate up against each other. We have also created new statistics that will tell you how the players will rate up against the opponent – what position they are likely to play in the team, how effective they are at what position, and where they rank in terms of goals, assists, tackles and dribbles per game. **New Players** – FIFA 22 will feature three new player archetypes that all share the core characteristics of the previous archetypes, but have evolved into a new design with a more realistic appearance. Players will have a new way to run, jump, defend, shoot, pass and dribble, making them more realistic. **The Battlefield** – FIFA 22 brings the famous 7v7 game mode to

What's new:

- **Passing - Introducing a new passing AI system. Now players understand better when it makes sense to complete a pass to prevent the ball being taken away from your teammates. You can now instantly read your teammates' run offs to improve passing. We have made significant improvements to the systems behind challenging passes to stop them becoming too easy and makes the player more aware of their team mates teammates and mindballing(ball watching). New 'control your pressure' autorelays mean your team mates hold the ball up and get the best out of the situation and make better passing decisions.**
- **Defending - We have made defensive play more intelligent in a new way. Depending on the type of defender, they will defend from different areas on the pitch. Players now know where they need to press when defending, cover for their partner and force the opposition into plays that they might not be expecting. We have introduced support markers which highlight your defender's position and how long it will take to reach their target with a shadow. The new Ball Highlighting system allows you to see when your defender will be able to intercept the ball allowing you to play your game however you see fit. FIFA incorporates over 500,000 lines of conditional logic unique to the online experience allowing you to make the most correct decision from the most unpredictable situations on the pitch.**
- **Preferred Tactics - We have introduced location based tactics into the most prominent online modes, allowing players more choice over how they play. Each of the five tactics (Standard, Rotation, 3 at a time Formation, 1 vs. 1 and Managers) has specific tactical instructions and depending on the game mode, can be played set to offensive, defensive, or balanced.**
