4.0.x.x. so on. zip This is how it  
generally works for.zip and.rar files.  
But in this case, it is not a single.zip  
file. It is multiple files. You want to  
make sure you only download one of  
the files. You also want to make sure  
you download the right file. Since you  
only want one of the files, and not the  
whole.zip file, you need to make sure  
you download the correct file from the  
list of files with the same name. The  
files with a different file name are  
different when you downloaded. One  
is not a variant of another. Q: Why do
