The original game continues to make use of Unreal Engine 3 for an increased level of realism,. Xpand 2 is a powerful VST sound effect processor, and has been one of the most sought.1. Field of the Invention The present invention relates to a liquid crystal display device, and more particularly, to a liquid crystal display device that increases a display quality by decreasing a color shift occurring in a liquid crystal display element. 2. Description of the Related Art Recently, many types of portable electronic apparatus that use a liquid crystal display device such as a portable telephone have become popular. As a display screen size of a liquid crystal display device is increased, a wide angle of view is required. If the size of the display screen is increased, a color shift occurring in a liquid crystal display element is generated. As a method for reducing a color shift in a wide angle of view, a method for increasing the width of a black matrix around a picture element in a liquid crystal display element has been proposed. As another method, a method for increasing the number of picture elements in a liquid crystal display element has been proposed. In this method, since it is possible to increase the number of picture elements in a liquid crystal display element without increasing the size of the display screen, a color shift is prevented even when the size of the display screen is increased.
