This technology, together with FIFA's world-class animation and AI components, and the ground-breaking Lusitano Mobilité physics system, pave the way for new gameplay features, such as: dynamic game speed and physicality; dribbling; dribbling with the ball at full stretch; ball control and lofted shots; goalkeepers now switch their positions between playing and diving; and new ball physics. Key Features: FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. Fifa 22 PC/Windows (Latest)

FIFA is the most popular football video game in the world. This year EA SPORTS will continue to innovate in player intelligence, visual fidelity, and gameplay and introduce many new features that give players more control and more authentic football experiences. FIFA 22 is the sequel to 2014's FIFA 15, but based on the new controls and gameplay, it feels like the next chapter of the series: a total rework of the classic gameplay and visuals of FIFA. It's just closer to real football, and I loved it from the moment I heard it in-game. Virtual Pro Evolution Soccer (VPS) Revolution A virtualization that simulates the way real soccer feels, down to every tackle, free-kick, and corner. All the same intensity and emotion as real football in a way that I've never felt in a sports game before. More accurate physics throughout the game making it more rewarding when you score and more exciting when you lose. Fully customizable playing style including a new passing system, a 360-degree pass mechanic, and the ability to set your own playing style including a unique favorite formation, distinct wingers and all-new skills. More goalscoring opportunities made possible by enhancements to the Foul system and an expanded 3-on-3 gameplay mode. More chances for success with 360-degree passing, and all-new defensive behaviours. More free kicks, corners, and penalty kicks More World Cup teams, more player data, more stadiums Enhanced Presentation This year's FIFA will come with hundreds of new animations, more authentic player movements, lifelike player collisions, and more player individuality than ever before. Locked-in-place player control Squads made their return in FIFA 20, but making a real soccer game is more than just running around and taking shots. Playing against an experienced squad can be tough, but feeling out of control is even worse. FIFA 22 tackles this with locked-in-place player control. Give a player the ball, and you no longer have to worry about their position. Gripping for the ball is much more natural, and the acceleration and spacing of players is more accurate. The ability to control players with the stick has been tweaked to respond to pressure, and sprinting with the ball no longer feels unnatural. Have It All - Be a Pro bc9d6d6daa
