Corinos Description: Corinos is an app designed to help you organize your life, by reminding you of important daily tasks and events. It uses a different way of reminding you to execute tasks. Each reminder has an ID, which is a personal and unique identifier for the task. You can also create notes for each appointment. You can then add them to your tasks, where you store important information about your tasks. Corinos also features an interface that is simple to use, and has a different look and feel for each section. There is a basic mode, which you can use to create a simple note and also a calendar. The calendar allows you to create events and set reminders. These reminders will then trigger, and when they do, you will receive a pop up message, where you can check the status of your task and set reminders for the current event. Corinos is a neat app that is very simple to use, but it does have a couple of drawbacks. It only allows you to add tasks or notes. It doesn't have any options to edit your tasks or notes and it also does not allow you to view a calendar or set reminders. Corinos Version: 2.2.1 Version 2.2.1 I version 2.2.1 Version 2.2
