Print your license and power on your WindowsÂ® PC or tablet.. can you activate windows after a trial period of 3 months?Â .New Delhi: Poonam Pandey, the woman arrested in connection with the international trail of terror by Pakistan-based terror outfit Jaish-e-Mohammed (JeM) chief Masood Azhar, was offered a job to work for the terror outfit, her brother Arvind Pandey has said. Arvind's statement was in response to a tweet by Rajnath Singh about the arrest of Poonam, who shared a screenshot of her brother's post on Twitter. Poonam, who is accused of playing a role in the Pulwama terror attack, was arrested on December 13 in connection with the plot to assassinate former President of US Barack Obama. On December 28, a team of the National Investigation Agency (NIA) raided her residence in south Delhi. The NIA, in its latest charge sheet, claimed Poonam was a close associate of slain JeM chief Masood Azhar and that she had helped his brother Maulana Saad in preparing and getting conspirators and arms for the Feb 14 attack on CRPF soldiers. In November last year, the NIA had claimed that Poonam had conspired to kill former President Obama, who was visiting India, and had urged Maulana Saad to join the conspiracy, pointing out that both hailed from the same town. A first information report (FIR) had accused Poonam of having links with Jaish-e-Mohammed chief Masood Azhar, the mastermind of the Pulwama terror attack on February 14, in which 40 CRPF personnel were killed. The FIR also claimed that she had links with Hizbul Mujahideen terrorist Burhan Wani, and gave weapons training to his two associates. Poonam had also offered to provide funds to them, the FIR claimed. In a press conference, Arvind had told ANI that Poonam had offered a job

The award is based on an application process that identified college, general education and major specific areas of excellence for each student. Candidates were selected in the areas of academics and leadership by a committee of faculty. "The applications show that the students, who have diverse academic strengths in areas including science, chemistry, math and pre-med, are exceptionally committed to their studies and are an exceptional fit for the college," said Andrew Rubin, dean of the College of Arts and Sciences. "We are pleased that these students have been selected to benefit from their investment of time and effort."Neurochemical changes following acute drug administration. Drugs that cause substance P (SP) release can evoke a rise in c-fos activity. As c-fos expression may reflect cellular activation during seizure activity, we investigated whether systemic
