Advertisement Advertisement Advertisement Compatibility with Other Programs Adobe Photoshop Elements uses Open XML, which allows users to see the underlying document structure. In turn, this means that you are able to open files in Photoshop Elements and other programs that use Open XML such as Microsoft Office. Any adjustments made to the document in Photoshop Elements can be transferred to other programs such as Photoshop when you save the document. To easily bring your edits back into Photoshop, any files you create with Photoshop Elements should be saved in Open XML format. Some devices do not display Open XML or PDF files. For example, some iPhones and iPads cannot display Open XML documents. In those cases, you can save files in a different format such as Photoshop PDF, and then send the file to the device or print the file. To export your document in PDF, click File, and then choose Save As. If you would like to export in a different file format such as Open XML, choose Options. You can also save a copy of a Photoshop Elements file in Windows in the native file format. You can then open the file in Photoshop to make further edits. Using the File menu, choose Save As and save the file in a different format such as PDF. More About Open XML Open XML is a format that combines a number of elements of file types. These are associated with a particular purpose. You are able to save documents in the following formats: PDF Office Open XML (OOXML) Office XML Paper Drawing (OPDX) Office XML Paper Presentation (OPPX) Word Open XML (WXML) XPS XML Paper Specification (XPS) XML Paper Presentation (XPS) XML Paper Drawing (XPSX) Adobe Photoshop Elements also uses Open XML to create documents. If your device cannot display Open XML files, you can save the document in a different format and then export the file to be readable by other programs. To save a document in a different format, first open the File menu, and then choose Save As. The Save As dialog will ask if you would like to Save a Copy. If so, you can save the file in a different format by clicking Save. If you choose not to Save a Copy, then just click Save. Find the File Formats for Saving the Documents 388ed7b0c7
