Photoshop is designed to be used in conjunction with another program, Adobe Photoshop Elements, which is a program that is free of charge and is aimed at people who are just getting into digital photography. Photoshop includes more tools than Photoshop Elements, so the number of selections available to an amateur photographer may be more than you need at first. Once you get the hang of using Photoshop, though, you'll find that you can create quite a number of different effects using just Photoshop. This tutorial will teach you how to use Photoshop to enhance your photos, and if you follow each step carefully, you'll be able to create some amazing effects in no time. If you are looking for a comprehensive, versatile and powerful image editing and graphic design software, then Photoshop Elements is the best software for you! But before we go into Photoshop elements, let's take a quick look at what Photoshop is. What is Photoshop? Photoshop is a photo editing, graphic design, or both software. It helps you to adjust the color, brightness, and contrast of your photos, adjust the text style, add layers, use various filters, and much more. Photoshop comes with two paid versions: Photoshop and Photoshop Elements. Photoshop, which is the long-time standard, has a much more sophisticated user interface and has features to align text and paragraph, apply various effects, create new shapes, edit live photos and much more. However, Photoshop Elements is easier to use and doesn't have the same number of powerful features as Photoshop. What is Photoshop Elements? Photoshop Elements is an alternative to Photoshop. It is a professional graphics program designed to provide basic image editing, web design tools, photo editing and effects in a sleek, easy to use package. It is smaller and less sophisticated than Photoshop. What Are the Photoshop Elements Alternatives to Photoshop? The Adobe Creative Suite was previously known as Photoshop Elements. Q: Laptop won't start- Asus Eee PC 1015BN? I have recently bought an EEE PC 1015BN and I have installed Windows 7 64-bit Ultimate. When I turn on my PC, it turns on, beeps a few times, then goes to a black screen with the following message: Generic boot device not found. (BIOS not loaded.) Ubuntu 9.04, GRUB2 64-bit, AMD 64x2 What can I do? Thanks! A: That's not an EEE PC issue, it is a Windows 7 issue. To boot into Windows 7, go to the boot menu. Press and hold the shift key, which puts you into the advanced boot menu. Press down key to highlight the recovery option and press enter. Choose windows repair. After repair, boot into windows 7. A: The solution is on the Asus Eee PC site: Back up your important stuff and try this: 1. Stop using the hard drive. 2. Power the computer off. 3. Remove the battery and leave the hard drive plugged in. 4. Leave the computer for 2-3 hours, to let the hard drive completely cool down. (Use a hairdryer or your fingers to get the hard drive hot.) 5. Remove the power adapter (remove the battery if it is still in there). 6. Replace the battery. 7. Start using the computer. A: I had the same problem. I could boot into Windows 7 (64-bit, Legacy or EFI mode) but no video or audio. I boot in to the BIOS, then into safe mode. Resolved. A top Securities and Exchange Commission official said on Tuesday the agency has "no interest" in regulating bitcoin, adding that the cryptocurrency is "not capital markets related." "There's no interest from this side of the street to regulate [bitcoin]," William Hinman, chairman of the SEC's financial markets and trading division, told Bloomberg Television in an interview. "The whole effort to try and establish regulatory treatment for bitcoin as an enterprise I think is misguided," he said. Bitcoin has been hot

Q: How do I save user input after it is completed? Scenario: The User connects to a webpage and watches a series of videos. He is prompted to answer a question. Depending on his answer, the next video he watches is different. He can only watch one video. I want to save the user's response to the question to a file. I have the following code: function disableSavedVideo(saveVideo) { window.localStorage.setItem("video", saveVideo); } if (localStorage.getItem("video")) { var nextVideo = localStorage.getItem("video"); } else { if (saveVideo == "video1") { document.getElementById('video1').disabled = false; document.getElementById('video2').disabled = false; document.getElementById('video3').disabled = true; } else if (saveVideo == "video2") { document.getElementById('video2').disabled = false; document.getElementById('video1').disabled = true; document.getElementById('video3').disabled = true; } else if (saveVideo == "video3") { document.getElementById('video3').disabled = false; document.getElementById('video1').disabled = true; document.getElementById('video2').disabled = true; } } video1
