For the first time in FIFA, create teams comprised of up to 32 players. The Four Seasons Engine, which is developed by Finnish developer IllFonic, helps make this feel like the real thing with full, realistic animation and crowds. Simply put, the technology at the core of this engine has never been attempted before. Victory Moments It's time to deliver the moments that change matches, this time in handheld mode. The Victory Moments are a set of interactive elements which make the outcome of the game unpredictable. These will now pop up at the perfect moment to change a game in your favour. Shot

Profile Pitch Profile Trajectory Visualisation The Shot Profile, Pitch Profile and Trajectory Visualisation allow players to see and understand the movement of their shot. Player movements are essential for goal-scoring opportunities, but none of this is visible until you pull the trigger. Top and Bottom Corner Kick With FIFA 22, you can pull off goals with players outside the penalty box, just like a true striker. This allows you to exploit the space at the top and bottom corners of the pitch. Soccer Scouting If you're the type who prefers to track back and pass, then you'll be pleased to know that you can now track back from your marker position, and you'll also be able to pull players out of position. Referee We believe that the referee of the real game is just as important as the players themselves, and that's why the gameplay will now react to the referee's decisions. For example, if your player gets sent off, the crowd will react with anger. Brand New Player Create In FIFA 22, you'll get the chance to create and manage your own real team, from a third-party mode. This is a new way to experience player management and make the most of your real life transfer budget. Serena VS Venus Get to know the models of your favourite player, the stars of the World Cup™, including Serena Williams and her rival, Venus Williams. bc9d6d6daa
