An intuitive Web app editor that allows you to design and manage your online Web apps from scratch. It is designed to make sure that the process of creating and managing your online apps is as seamless and as swift as possible. Undo or redo up to 35 times, and view your actions on screen in real-time Create your online apps using the handy interface displayed, an easy-to-use tabbed toolbox that allows you to design any type of Web page, regardless of what language you're using. With this app, it is a breeze to customize your apps' look and appearance and access its settings right from the editor. All you have to do is just select a desired element on the screen, and all you have to do is click on a button or drop down menu, edit your settings and apply the changes to your apps. There are some limitations that you should keep in mind when using the app: you can only use the tools and features provided for creating and editing your apps. Maintain and modify the flow of the processes that connect with your apps Thanks to the built-in flow editor, you can easily and effectively maintain the flow of the processes connecting with your apps. The editor is user-friendly and offers valuable assistance in changing the specified flows and behaviors of your apps. Not only can you edit the app settings and edit existing elements, but you can also group different elements together so they can communicate with each other. Create easy-to-maintain flow diagrams that will act as a milestone of your apps' whole development The built-in flow editor will provide a comfortable way of expressing and structuring your flow diagrams. You can create flow diagrams in any format, be it simple, diagrammatic or flowchart-like, and make modifications to them without much effort. You can reuse the diagrams, which can then be applied to other apps in a similar manner. Create and edit widgets, lists and more The app allows you to create and edit custom widgets, lists, pictures, text and more using the handy toolbox. Click and drag to resize widgets, add new ones, rearrange them or even copy and paste them from one app to another. Make sure that you use consistent naming when you copy and paste the widgets in order to easily identify them and manage their position in the list of elements. Select your element type on the screen, and then use the dedicated property tab to customize its settings. This way,
