How to Give a Great Portrait to a Child Most of us think of portraiture as photography taken of a person. It's true, though the term has also come to mean digital photography taken of a person. What's more, this term can actually be applied to any photographic work done to portray the likeness of a person in a manner that is artistic and that, hopefully, creates a high level of interest among others who see it. With all that in mind, it's easy to see why the ability to create beautiful portraits can be so elusive for many photographers, even when they have the talent and the knowledge to do so. The fact is, no matter what background one has, the ability to create portraits of a person is not taught in school. It's taught by doing, and more often than not, being put in the situation where the need to create such a portrait is a bit dire. That's where I come in. So, this is what I do, not for publication, but rather for this public blog. I try to help out the photographers I know who are having difficulty doing what I do so well, and do it without all the talk (as much as I can avoid it). Thus, what I provide here are my suggestions of what I think would be helpful to photography as a whole, and thus, a wonderful gift for all photographers. What it all boils down to is three steps. Step 1: Understand the need and psychology of the subject. The most common lack I see in portraits, especially those of children, is the lack of understanding of the psyche of the person posing. It's not that there is anything terribly wrong with this, as some may imply. It's simply that the common approach, in most cases, is the approach of the photographer. The photographer wants the subject to stand against a backdrop, pose in the manner that the photographer wants and wants the subject to look good. But, that's the problem. And it's not that the subject has a problem. It's that the subject has no idea about what is going to make the photograph really special or why the photographed person would want to have a portrait of himself or herself done. And, that's what will make the photograph really special, because it's the personality of the person that ends up being the special part

Q: How to remove an X from the Git history? I accidentally committed the original X.jpg into the history. The history was like this: A-B-C-D-X-Y-Z. So I pushed the X.jpg into the remote repository successfully (it has the same SHA1), and then made a new commit, X-W-X' I'm wondering how to get rid of the X and merge the A-B-C-D. A-B-C-D-X-W-X'. Thank you. A: This can be done with git filter-branch. It may be a good idea to remove the file first. `$ git rm -rf. $ git filter-branch --index-filter 'git rm --cached --. && git reset --hard origin/master' HEAD $ git push origin +master` A: You can remove the file with a simple `git rm` or `git rm --cached...` Then, you can commit again, no worries. EDIT If the file was already deleted but its content was still present in the history, you could use `git filter-branch -f` to force the deletion of the commits related to the file. A National Review analysis of ballots in ballot-machine states finds evidence of a "negligible amount" of voting fraud. On Thursday, the 10th U.S. Circuit Court of Appeals upheld a law that forces voters to show photo ID in order to vote. By saying that the law does not discriminate against voters of color or Democrats, the court effectively struck down the law. National Review took a look at ballot-machine states and found that there's no evidence of voter fraud, as the court said. The Judicial Watch analysis found no evidence that any voter fraud was successful in Wisconsin or Indiana. Moreover, there was no evidence of voter fraud in Kansas, Kentucky, Maryland, Minnesota, Missouri, Oklahoma, Pennsylvania, or Tennessee. JW: Of the 27 states employing so-called ballot-counting systems, we found very little evidence of voter fraud. Of these 27, only two have the potential to make a real difference, Indiana and Wisconsin, where the race is close. Indiana has a district court case that challenges the state's voting system. Wisconsin has one too, but it was so poorly presented
