

Combined with new animations created for each player by renowned animation director Gustavo Siciliano, “HyperMotion” technology brings a new sense of personality and authenticity to every team, player and pitch. FIFA 22 also introduces a number of new game features, including improvements to the MyPLAYER controls. Optimized for both next-generation consoles as well as PC and Mac, FIFA 22 features the most advanced MyPLAYER controls to date. Features: New Take On the Beautiful Game in FIFA 22 with Real Player Motion Technology The new “HyperMotion” engine delivers an authentic and unpredictable football match using the most realistic movements ever captured on a football pitch. Players react intuitively, fight hard to win every challenge on the pitch and every second counts. Enhanced Player Interactions New ball and player control options allow for more fluid gameplay on every type of pitch and in any weather condition. From goalkeepers to strikers, defenders and midfielders, MyPLAYER comes alive with new animations, reactions and control options. Players can now shield the ball with one-handed strikes or throw the ball with perfect timing and accuracy. New Tactic Engine Another FIFA hallmark is the comprehensive tactical system, which generates strategic decisions tailored to match scenarios. With new tactics – including an AI-driven tactic that will adapt as game circumstances change – players can make smarter tactical decisions and change the flow of the game at any time. Improvements to the Player Experience FIFA 22 provides many improvements to the player experience. Players can personalize their attributes now with more than 3,000 additional Pro Maker traits to choose from. Following the launch of FIFA 21 in November last year, players are once again able to make their FIFA franchise the best it has ever been with Pro Player Status. New Camera Adjustments The camera now provides a greater level of detail and comes closer to the action, making the beauty of the game more immersive. New Player Controls The new MyPLAYER controls provide a far more intuitive and responsive experience than previous versions. With the new controls players can sprint, slide tackle, shoot, hold-up and keep the ball, as well as create space and complete dribbles. Improved Collisions Dynamic collision response gives players more control over the outcome of a tackle, providing a far more realistic and flowing experience than in previous titles. Players can more easily avoid or be pushed

Fifa 22 Features Key:

- *Welcome back to 'World Football'*
 - World-class playing and creating. Authentic and immersive. FIFA football continues to evolve.
 - Ball physics for smarter, more realistic gameplay. The ball now carries momentum as you strike on target, controlled by a new, physics-based control system. Other notable changes:
