Professional photographers and graphic designers use Photoshop to manage and organize their work, and more sophisticated users use it for non-photographic image editing. PSD, TIFF or JPG? Image source: Adobe Photoshop Adobe Photoshop's image format files are named PSD. It supports PSD, TIFF, GIF and JPEG, an older image file format. While the PSD format is the primary image format for editing Photoshop documents, its TIFF format is more stable and can be used as a backup. The TIFF file format was initially built for phototypesetting, but is now used by Photoshop as well. Photoshop uses a lossless compressed format, so TIFF supports files up to 12,000 pixels wide by 8,000 pixels high. Photoshop doesn't directly support the size of images it can import, but it can open native PSD images that are up to 20,000 pixels in height by 20,000 pixels in width. PSD files are used across the range of Photoshop's features. They can be used to create image previews, graphics, animation, and music, and for image-editing, vector, charts and photo-retouching. A.PSD file extension means a Photoshop document. ADO file extensions are used for Adobe's older formats like.AI,.EPS and.WMF. These are used in older versions of Photoshop and graphic design applications for illustration. Adobe Photoshop Export Formats For exporting Photoshop documents, Adobe offers a vast range of file formats for both graphic design and photography applications, and Photoshop is no exception. Its export formats include: Misc PSD with the /m extension: This is a Photoshop document with the /m extension used in the first version of Photoshop. It's compatible with the older versions of Photoshop from 2.5 through 7. PSD with the /psd extension: This is a Photoshop document with the /psd extension used in Photoshop CS 2.0, Photoshop CS 3.0, Photoshop CS 4, Photoshop CS 5 and Photoshop CS 6. JPG with the /jpg extension: This is a JPEG image with the /jpg extension used in Photoshop CS 4 and Photoshop CS 5. TIFF with the /tif extension: This is a TIFF image file with the /tif extension used in Photoshop CS 2.0, Photoshop CS 3.0, Photoshop CS 4, Photoshop

T cell/B cell interactions in the induction of primary humoral responses in B cells. I. The role of "helper" T cells in the in vitro antibody response of normal, murine spleen cells. The role of T cells in the induction of primary humoral responses in B cells was investigated. Supernatants from wells containing resting, murine spleen cells induced a strong primary IgM response in wells containing B cells but failed to induce a significant IgM response in wells containing B cells and specific antigen-presenting cells, as assessed by recrystallization at the single cell level. The addition of syngeneic T cells induced a strong IgM response in the absence of antigen-presenting cells, but did not alter the kinetics of the IgM response to antigen-presenting cells. This was taken as evidence that the T cells were not truly helper cells. More importantly, T cells from mice infected with different strains of lymphocytic choriomeningitis virus (LCMV) expressed a state of activation and were able to induce IgM responses at the single cell level in the presence of specific antigen-presenting cells. The requirements for the induction of a primary humoral response to antigen-presenting cells and to specific antigen were thus similar. Furthermore, supernatants from wells containing antigen-primed, LCMV-specific B cells failed to induce an IgM response in the absence of specific antigen. However, the addition of syngeneic, antigen-specific, T cells to antigen-primed B cells was again ineffective in inducing a humoral response, but did alter the kinetics of the IgM response. These results suggest that T cell-associated B cell interaction plays an important role in the induction of a primary humoral response, but that these responses can be induced in the absence of T cell-associated B cell interaction.

Top 5 Ways to Create a Facebook Page for Any Business to Boost Brand Exposure Facebook is becoming an increasingly important platform for businesses to connect with the brand's audiences and boost engagement with them. If you're not already on Facebook, it's essential you set up a page for any business you want to communicate with your customers and

prospects. A Facebook page is also a fantastic way for your customers to support your business and share their experiences. It's good for free exposure and it's another opportunity to connect with your customer base, no matter where they are. Facebook is a highly effective communication platform and if you're not using it to its full potential, you are missing out on a lot of business opportunities. Whether you already have a Facebook page or not, the following 5 steps will help you get your business a Facebook page, and grow your business using it. Let's start!

#1: Choose Your Facebook Username You need to create a Facebook username to use with your Facebook page. Do not put your company's name or business name as your username, that will make you look too much like your competitors. You don't want to confuse your customers. Choose a unique username that contains a phone number of your business. This will make it easy for your customers to connect with you via Facebook.

#2: Choose Your Facebook Page Cover Image A great way to engage with your audience and encourage them to like your page is by using a Facebook cover image. You will want to choose a clean, attractive image that contains the same phone number of your business as in the username. This is what your audience will come to know you by. They will be able to easily recognize your business and add you to their friends list.

#3: Choose the Location of Your Facebook Page If you are operating from your own business premises, you can always simply choose your own location as your location. If you are running a physical location, it's a good idea to make it clear that the business's location is located at the address that's linked to your Facebook page. This is a simple way to keep people local and link in with the local community.

#4: Choose Your Facebook Page Description The description is a brief, informative description of the work you do, as well as your goals and mission. The description should be
