UltraUXThemePatcher Screenshot: HOW DO I UNINSTALL A PROGRAM? An uninstaller program is a handy utility that enables you to remove any unwanted software from your computer. Removing a program from your Windows PC Many a time, you may have found that a program that you downloaded online has become a part of your computer. All you want to do is remove that program so that you can use your computer's hard drive space for other purposes. Step 1: Locate the uninstall program As with any other kind of program, you will need to find the executable file that the software vendor provides. Sometimes, it may be named SoftwareUpdater.exe, but it is also possible that the file name is something else. Go to the Start button on your computer, and choose Search. Type "Uninstall program" in the search box. As you type, you will see the program pop up. Just click on the program's name to open it. Step 2: Select the files to remove Select the files

that you want to remove from the program. This will only take a few minutes. Step 3: Locate the uninstall program Now that you have found the program, click on it and select Uninstall. It may take a while to complete, so

What's New In?
