Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Today I want to tell you about a free slot game which will leave you speechless and allow you to experience all the joy of playing slots for free. The name of the game is **It's Raining Slots**, and as it's a free game, it is quite big and the game developers are giving away a lot of free spins to us players. The game is a little bit different from other slots I have played on the internet. It has the unusual feature that you can win multipliers of up to 11 if you get some lucky streaks, but we'll see about that later. Let's start by looking at some of the gameplay features and bonus features. The Game Well, **It's Raining Slots** is played on a 3 reel, 5 payline slot machine, and you will need to get five scatter symbols for free spins to be added to your game. The game has a really nice sound track which takes us back to tropical rainforest climates in which the game is based. **It's Raining Slots** is not a free flash game, but it is a Java game, which is a cross between a free flash game and a browser game. If you want to play the game you simply have to visit **It's Raining Slots** and click on the play now button at the top of the page. The Game has come with around 100 different wild symbols, but it's not really important for us to look at all the different symbols as this slot game is about winning the free spins bonus rather than the wild symbols. Let's start by playing with the free spins and let's see how lucky you can get, but first let me take you through some of the things you need to know before playing **It's Raining Slots**. Some of the things you should know before playing this slot game Before we start playing this slot game, there are a few things you should know. We'll start by talking about the things that most online casinos do not talk about which you might have never heard of and as this is a free slot game it is not a scam. You can win free spins in it's rain slots. Yes, it's really possible to win free spins, and the free spins will add up to a total of 50 spins in the case of this game. In order to get free spins you just need to get five scatters in the game, so do not think you can't get some free spins because you have only got
