

DECENTRALIZED APPLICATIONS

DApps With Ethereum.

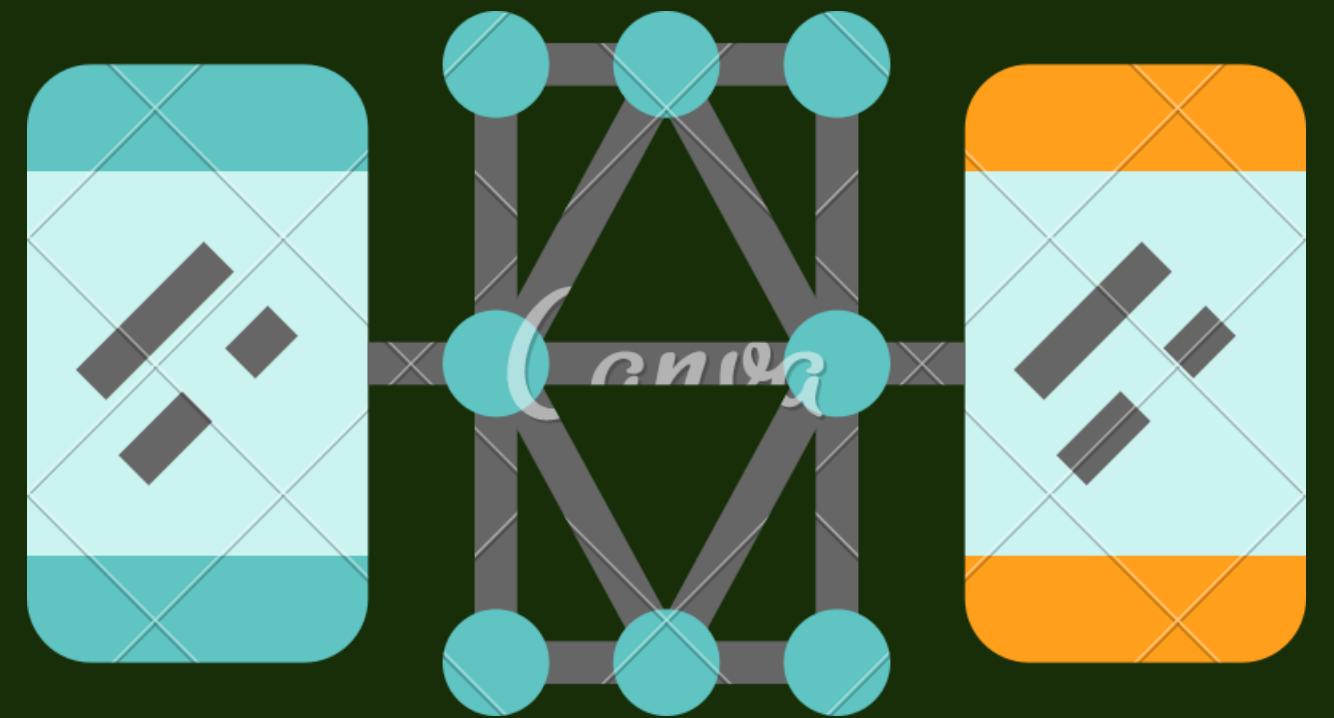

Dapps operate on Ethereum
an open public decentralized
platform where no one person
or group has control.

HOW DOES DAPPS WORK?

Dapp is a Decentralized application and traditional apps look at some in many respects offering a service, for example, running a social network making a stock trade, or handling some other rote task.

WHAT IS A SMART CONTRACT IN DAPPS?

A smart contract is like a set of rules that live on a chain for all to see and run precisely according to those rules. Even more specifically, dApps are mostly found on the Ethereum blockchain.
